In the photo imaging business, sales of instant photo systems such as the *instax* series and various designs of *instax* films increased especially in the United States and Europe, because the pleasure of printing photos on the spot was re-realized. Sales also increased as a result of the expansion in the high-value-added printing business. Main contribution to this expansion were sales of the *Year Album* service, which can select good photographs and arrange them automatically, and the *Shuffle Print* service, which can summarize photo data and print it on a single sheet, and sales of photofinishing equipment and materials accompanying it.

In the optical device and electronic imaging business, sales in the electronic imaging field decreased due to a decrease in the sales volume with the shift to high-end models, while the sales of premium digital cameras *X Series* centering on the interchangeable lens camera, *FUJIFILM X-T10*, launched in June 2015, were strong. *FUJIFILM X-T10* can realize outstanding image quality and comfortable operability with a compact and lightweight body. TeraMedica offers archive solutions for managing and storing a range of digitized in-hospital clinical information, including diagnostic images of PACS to movie file images. Fujifilm will combine TeraMedica's systems with its medical IT systems to offer solutions that contribute to medical diagnosis at a greater efficiency than ever before. Regarding the FPD materials business, overall sales decreased reflecting inventory adjustment of polarizer and other factors. Fujifilm is working to expand sales of products for LCD TV, and thinner products for use in small and medium-sized displays where the demand is growing. Moreover, Fujifilm is promoting the expansion of such new business fields as the related materials to touch-panels and backlights, as well as protection film for polarizer.
