Overviewing the global economy during the third quarter year to date of the fiscal year ending March 31, 2014 (April 1, 2013 through December 31, 2013), the general trend of gradual economic recovery persisted. In the United States, the rise in interest rates, which would accompany the curtailing of the quantitative easing policy, could have a restraining effect on the economy. However, the recovery trend in consumption is continuing and, along with the firm trend in domestic demand, the movement toward recovery in the corporate sector is strengthening, and the pace of growth is accelerating. In Europe, even if unemployment rates continue at a high level, consumption is showing a trend toward gradual recovery. Regarding Asia, the pace of Chinese economic expansion became slower, which had negative impacts on exports to China, especially, in Korea and Taiwan, but the ASEAN countries generally sustained robust growth. In Japan, the preparation of a large-scale supplementary budget and the bold monetary relaxation measures by the Bank of Japan supported the trends of yen depreciation and stock price rises, and economic expansion continued.

As the Fujifilm Group sets its medium-term management plan VISION80, which will complete its final year on March 31, 2014, through concentrated investments of management resources in priority business fields, such as healthcare, highly functional materials, and document solutions, of significant growth potential, where the Group has technological advantages, as well as in globalization mainly in emerging countries, the Group is moving ahead to increase its sales and expand its market shares by engaging in speedy and dynamic activities and the foundation has been laid for new growth.

During the third quarter year to date of the fiscal year ending March 31, 2014, the Fujifilm Group recorded \(\frac{\pmathbf{\pmathbf{4}}}{1,774.4}\) billion in consolidated revenue (up 10.1% from the same period of the previous fiscal year). Consolidated revenue increased by \(\frac{\pmathbf{4}}{163.2}\) billion, comparing to the same period of the previous fiscal year, reflecting such factors as strong sales in the medical systems business, the graphic systems business, and the documents business, and positive effects of yen depreciation, in spite of harsh situations of sales of digital cameras owing to a decline in overall demand for compact digital cameras.

Operating income totaled ¥99.6 billion (up 52.4% from the same period of the previous fiscal year), reflecting such factors as increases in sales, and positive effects of yen depreciation. Income before income taxes amounted to ¥114.2 billion (up 81.7% from the same period of the previous fiscal year), and the net income attributable to FUJIFILM Holdings totaled ¥62.5 billion (up 116.6% from the same period of the previous fiscal year), reflecting such factors as the improvement in foreign exchange gain.

The effective currency exchange rates for the U.S. dollar and the euro against the yen during the third quarter of the fiscal year were ¥99 and ¥132, respectively.

Imaging Solutions

In the Imaging Solutions segment, consolidated revenue amounted to ¥278.0 billion, up 7.2% from the same period of the previous fiscal year. Such factors as the expanded sales of lens modules for use in smartphones led to the consolidated revenue to increase.

Operating loss decreased to ¥1.5 billion, due to strong sales in the photo imaging business, such as instant cameras, and cost reductions and other factors.

In the photo imaging business, sales of instant cameras, such as the *instax mini 90*, which was launched in September 2013, increased substantially, sales of high-value-added print business, such as the *Year Album*, expanded, and yen was depreciated with positive effects which led to an increase in overall sales.

Sales in the optical device and electronic imaging products business, which was integrated in June 2013, increased, because sales in the optical device field, such as lens modules for use in smartphones, were strong, while sales of compact digital cameras decreased.

In the electronic imaging field, the sales such as the *FUJIFILM X-E2*, an interchangeable-lens-type premium camera, which was launched in November 2013, and the *FUJIFILM X100S*, a premium compact camera were strong, but the backdrop of a decrease in overall demand for compact digital cameras, reflecting the spread of smartphones, caused the consolidated revenue to decline. Fujifilm is working to expand and strengthen the product lineup in the *X Series* of premium cameras that leverage Fujifilm's exclusive technologies and, *XF Lens Series*, interchangeable lens systems, whose market is expected to be growing.

In the optical device field, overall sales increased because the sales of lens modules for use in smartphones increased substantially, and the sales of TV camera lenses increased.

Information Solutions

In the Information Solutions segment, consolidated revenue amounted to ¥671.2 billion, up 8.8% from the same period of the previous fiscal year. Strong sales of the medical systems business and the graphic systems business led to the consolidated revenue to increase.

Operating income amounted to \\$53.5 billion, up 26.2% from the same period of the previous fiscal year,

reflecting such factors as strong sales in the medical systems business.

Sales in the medical systems business increased substantially, because overall sales, such as medical-use picture archiving and communications systems (PACS) and endoscope, were strong, and because of positive effects of yen depreciation.

In the medical instrument field, Fujifilm recorded strong sales of FCR PRIMA Series, a compact and relatively low-priced FCR line in the digital X-ray diagnostic imaging system, centering on such overseas markets as emerging countries, and CALNEO Series, DR cassette in the digital X-ray diagnostic imaging system, centering in Japan.

Fujifilm increased its sales in the field of endoscope products, reflecting its strong sales of new trans-nasal endoscopes centering in Japan, and sales of a new generation of endoscope systems, under the brand name of *LASEREO*, were strong.

In the ultrasound business, high-end products *X-Porte*, which realized sharp and high-resolution image qualities with high image processing technologies, was launched in September 2013 in Europe and Australia, and in November 2013 in Japan and the United States.

In the medical IT business, Fujifilm has been working to expand its business in the diagnostic information field centered on medical-use picture archiving and communications systems (PACS), and these efforts led to an increase in domestic and overseas sales. Especially in Japan, Fujifilm's *SYNAPSE* line of PACS is continuously maintaining the leading market share in this field.

Sales in the pharmaceutical product business increased, reflecting strong sales of ZOSYN, an antibiotic combination product incorporating a β -lactamase inhibitor, as well as the oral new-type quinolone antibacterial agent OZEX fine granules of Toyama Chemical Co., Ltd., growth in sales by FUJIFILM Pharma Co., Ltd., of brand-name drugs of Bayer Yakuhin Ltd. obtained through a partnership agreement and the start of sales, and other factors.

Fujifilm has planed to start clinical development of anticancer agents from next spring with The University of Texas MD Anderson Cancer Center, one of the world's most distinguished facilities for cancer research and treatment, in its move to develop anticancer drugs in the United States, and has been steadily moving ahead with the development of its pipeline.

In the life sciences business, the sales of the *ASTALIFT WHITE* series of new skincare and skin-clearing product line were strong. Moreover, Fujifilm launched the *Lunamer Acne Care (AC)* of skincare products working on adult acnes in September 2013 and strengthened the lineup of the *Lunamer* brands of skincare products targeting women aged in their 20s and 30s,

In the graphic systems business, the volume of sales increased in the computer-to-plate (CTP) plate, and yen was depreciated with positive effects which led to an increase in overall sales. Moreover, in November 2013, Fujifilm and Heidelberger Druckmaschinen AG have unveiled a strategic partnership in the area of inkjet printing. Going forward, Fujifilm plans to expand its sales and market share centered on the printing plates and digital printing devices.

Regarding the flat panel display (FPD) materials business, overall sales decreased from the same period of the previous fiscal year, due to the WV film products affected by the weak demand of IT devices. However, because the strong sales of TV in North America and China led to an increase in the strong sales of its FUJITAC, retardation film for VA mode and zero retardation film for IPS mode. Fujifilm is working to expand and strengthen its product lineup through the introduction of thinner products to meet rapidly expanding demand for films incorporated in tablet PCs and smartphones.

In the industrial products business, the sales of industrial-use X-ray films proceeded smoothly, and the sales of touch-panel sensor films *EXCLEAR* and solar cell backsheet applications, which have been shipped since the fiscal year ended March 31, 2013, proceeded smoothly and other factors led to an increase in overall sales. Going forward, Fujifilm is working to expand its sales in the environmental and energy field, and touch panel field with expectations of growth.

Sales in the electronic materials business substantially increased, reflecting strong sales of such advanced products as CMP slurries and image sensor-use *COLOR MOSAIC* products, and semi-advanced products for Korea and Taiwan.

Sales in the recording media business increased, reflecting strong sales of *FUJIFILM LTO Ultrium 6 Data Cartridges* incorporating barium ferrite (BaFe) particles, positive effects of yen depreciation and other factors. Going forward, Fujifilm is seeking to expand its sales in the field of archived data by enlarging the storage capacity of magnetic tapes using the Company's unique technologies.

Document Solutions

In the Document Solutions segment, consolidated revenue increased to \(\frac{\text{\$}}{825.2}\) billion, up 12.2% from the same period of the previous fiscal year, reflecting such factors as the growth of sales in all areas such as Japan, the Asia-Oceania regions and export shipments to Xerox Corporation and the positive effects of yen depreciation.

Operating income amounted to ¥70.9 billion, up 35.3% from the same period of the previous fiscal year, reflecting increases in gross profit because revenue increased, and the positive effects of the improved manufacturing cost reduction and cost efficiency.

Regarding the office products business, in Japan, while the sales volume of monochrome products decreased comparing to the last year when Fuji Xerox was awarded a one-time large-scale contract, the sales volume of full-color products increased, comparing to the same period of the previous fiscal year, because Fuji Xerox recorded the strong sales of the *ApeosPort-V* series, which was launched in November 2013. Regarding sales in the Asia-Oceania region, the sales volume of monochrome models and full-color models increased. Regarding sales in export shipments to Xerox Corporation, the sales volume of full-color models increased.

In the office printer business, the sales volume in Japan remained at the same period of the previous fiscal year. Regarding the Asia-Oceania regions, the sales volume increased, reflecting strong sales of full-color models, and regarding exports to Xerox Corporation, the sales volume of full-color models increased, however the sales volume of monochrome models decreased.

Regarding the production services business, domestic sales volume of monochrome printers and color on-demand publishing systems increased, comparing to the same period of the previous fiscal year, while the domestic sales volume of the mid-and-small-sized printer for mission-critical operations decreased. In the Asia-Oceania region, Fuji Xerox's overall shipment volume increased, reflecting sales volume of the color on-demand publishing systems such as *Xerox iGen Series* increased. Regarding exports to Xerox Corporation, Fuji Xerox's overall shipment volume increased, centering on color on-demand publishing systems.

In the global services business, revenue increased in Japan from the same period of the previous fiscal year, owing to a rise in the managed print service (MPS). In the Asia-Oceania region, revenue grew substantially.

Fuji Xerox began operation of its new manufacturing company—Fuji Xerox Hai Phong Co., Ltd.—in Hai Phong, Vietnam in November 2013 as a new manufacturing site overseas. The new facility responds to increasing worldwide needs with the manufacturing and shipping of the latest products including digital color multifunction devices and small-sized light-emitting diode (LED) printers.

(2) Explanation on the Consolidated Financial Position

At the end of the third quarter, total assets increased by ¥181.7 billion or 5.9% compared with the end of the previous fiscal year, to ¥3,241.3 billion, owing to an increase in cash and cash equivalent, the positive effects of yen depreciation, and other factors. Total liabilities increased by ¥9.1 billion, or 0.9% compared with the end of the previous fiscal year, to ¥1,043.9 billion, owing to an increase in short-term debt, and other factor. FUJIFILM Holdings shareholders' equity increased by ¥158.7 billion, or 8.5% compared with the end of the previous fiscal year, to ¥2,027.6 billion. As a result, the current ratio increased by 16.3 percentage points, to 302.1%, the debt-equity ratio decreased by 3.9 percentage points, to 51.5%, and the equity ratio increased by 1.5 percentage points, to 62.6%, compared with the end of the previous fiscal year. The Company is confident that it is maintaining a stable level of asset liquidity and a sound capital structure.

| Net cash provided by (used in) financing activities | (5.3) | 190.7 | (196.1) |

During the third quarter of the fiscal year ending March 31, 2014, net cash provided by operating activities totaled ¥187.2 billion, due to an increase in net income and other factors. Net cash used in investing activities amounted to ¥94.4 billion, due primarily to purchases of property, plant and equipment. Thus, free cash flows—or the sum of cash flows from operating and investing activities— were ¥92.8 billion. Net cash used in financing activities amounted to ¥5.3 billion, due primarily to repayment of long-term payables.

As a result, cash and cash equivalents at the end of the quarter under review amounted to \\$555.7 billion, up \\$110.3 billion from the previous fiscal year ended March 31, 2013.

(3) Qualitative Information on Forecasts of the Consolidated Operating Results Revised Consolidated Earnings Forecast for the Fiscal Year Ending March 31, 2014 (April 1, 2013—March 31, 2014)

Fujifilm has revised up its forecasts of revenue, income before income taxes, net income attributable to FUJIFILM Holdings, and net income attributable to FUJIFILM Holdings per share for the fiscal year ending March 31, 2014 considering the performance during the last nine-month period.

Note: Effective the first quarter of the fiscal year ending March 31, 2014, Optical devices were transferred from Information Solutions to Imaging Solutions because of the structure change. The same period of previous fiscal year's figures are restated, accordingly.

Note: The major products and services of each operating segment are as follows:

Imaging Solutions Color films, digital cameras, optical devices, photofinishing equipment,

color paper, chemicals, and services for photofinishing

Information Solutions Equipment and materials for medical systems, life sciences products, pharmaceuticals,

equipment and materials for graphic arts, flat panel display materials,

recording media, and electronic materials

Document Solutions Office copy machines/MFPs, printers, production systems and services,

office services, paper, and consumables
